PROPOSAL FOR CRYPTOCURRENCY PROJECT LISTING ON VANTAGEX

Zero Team,

Good day, I am the founder and CEO Appsolutely Ltd. and the parent company of VantageX (formerly known as NemChange), a Global Cryptocurrency Exchange at <https://vantagex.io/>.

Our company is presenting a proposal for Zero to list ZER on our exchange. We believe that VantageX's experience in the fields of cryptocurrency exchanges and as a pioneer in integrating NEM mosaic tokens and ERC-20 tokens will contribute to the liquidity and trading volume of your cryptocurrency project.

Specifically, VantageX is intending to offer three (3) exchange pairs for ZER/BTC, ZER/LYL, ZER/ETH and ZER/XEM. VantageX will offer additional pairings based on the month and early confirmation by your cryptocurrency project. VantageX will offer promotional activities including: a video that will feature your token, announcements and social media posts, airdrops and token marketing solutions, and a joint press release.

Our limited offer is 1.5 BTC instead of our standard 6 BTC as we are expected to be integrated with CoinMarketCap by Q2 as we currently have over 10,000 registered users and emails and having over 400,000 USD in daily trading volume with just only 5 projects listed as of February. We expect our volume to grow to more than 1,000,000 USD per day soon as we have just launched VantageX this January.

Given that we are scheduled to integrate with CMC by April we will be extending this limited offer until March 31. Hoping for your kind consideration and we are inviting you to a conference call within the week to discuss our offer further.

Respectfully yours,

Patrick Palacios
Founder and CEO
Appsolutely Ltd.
